
ARE YOU AWARE OF APS?

Antiphospholipid syndrome (APS) is a life-threatening autoimmune condition that can cause strokes, heart attacks, DVTs and blood clots in the lung.

In pregnancy, APS is the most important treatable cause of recurrent miscarriage, and it is also associated with stillbirth, pre-eclampsia and premature babies.

1 IN 6
STROKES

under the age of 50 are caused by APS

1 IN 6
HEART ATTACKS

under the age of 50 are caused by APS

3
YEARS

is the average time it takes for a diagnosis of APS

34
YEARS

the average age a person is diagnosed with APS

3
MISCARRIAGES

before women are tested for APS

5
TIMES

the increased risk of stillbirth for a woman with APS

EARLY DIAGNOSIS

can prevent devastating consequences

LUPUS

is commonly associated with APS

Earlier diagnosis and treatment of this common blood condition could prevent heart attack, stroke, DVT and miscarriage. ”
